Consciousness starts with a question...

100mentors is the educational technology platform that empowers students to become more conscious by posing the right questions to the world's experts.

THE VALUE OF QUESTIONS FOR IB STUDENTS

IB learners are expected to become inquirers. Asking questions is an ongoing process that supports this disposition. **At 100mentors, we follow research that shows that when students ask questions, they:**

- Express their engagement and take ownership in topics already part of the lesson plan.
- Demonstrate and clarify their understanding.
- Develop the capacity for transformative critical analysis.
- Overcome doubt to become more confident learners.

Ultimately, students become more conscious.

HOW IT WORKS

Topics Q&A with Multiple Mentors

Teachers set the self-paced topic of discussion & students post their 20sec questions.

Multiple mentors answer in 100sec byte-sized videos, shedding light on different perspectives.

No class time required.

Live Sessions with Mentors:

Teachers set the session subject & bring the expert of their choice to join the class.

Students pre-set the questions, and their mentor answers, live.

WHY IB TEACHERS WORK WITH 100MENTORS

By connecting today's IB lesson plan to tomorrow's real experiences, we give teachers the tool to make their curriculum more relevant and engaging. Students learn not only the impact of their questions, but how to learn from others and different perspectives. When students realize that most questions have more than one answer, true learning has happened.

Teachers use 100mentors to turn their lecture into a conversation.

TESTIMONIAL

"Excellent **speaker**. Shared his experience with the students at an age appropriate level. Answered submitted questions as well as impromptu ones. Got the students thinking about the topic by asking questions back at them as well."

Dave D., IB Educator
